

MT SERIES

TRAY RE-ORDERING MACHINE

The MT-S/D can handle these kind of containers:

VIALS

SYRINGES

CARTRIDGES

OPHTHALMIC

BOTTLES

NEST

MT is a **single** or **double** unit to collect vials into trays.

Quincux system allows vials collection into orderly rows which make trays ready for their transfer to a freeze-drier for **lyophilisation process**.

When the tray is full, the machine stops automatically. **If it is a double tray loader when the first tray is full the vials are directed to the second tray and vice versa.** This enables continuous operation.
